

FOR IMMEDIATE RELEASE

Frontline Announces Upgrade Program to BPA™ 500 Dual Mode Bluetooth® Protocol Analyzer for FTS4BT™ and FBleA™ Customers

Charlottesville, Virginia, USA – March 1st, 2011 – Frontline Test Equipment, Inc. is pleased to announce an exciting new opportunity for Frontline customers with [FTS4BT](#) – “Classic” *Bluetooth* protocol analyzers or [FBleA](#) – *Bluetooth* low energy protocol analyzers. The [BPA 500](#) dual mode *Bluetooth* protocol analyzer allows you to see either or both “classic” and low energy *Bluetooth* communications all in one box. For a limited time Frontline customers can upgrade to the BPA 500 – Dual Mode (“Classic” BR/EDR and low energy) *Bluetooth* protocol analyzer at significant cost savings!

For over a decade Frontline has delivered world class *Bluetooth* protocol analysis tools to companies using “Classic” *Bluetooth* wireless technology in their devices. FTS4BT *Bluetooth* analyzer is the industry standard because of its unmatched decodes, live analysis, and interactive timelines. It provides precision analysis and insight into every stage of the development cycle. FTS4BT *Bluetooth* analyzer helps solve complex “classic” *Bluetooth* technology issues and helps engineers develop better, more interoperable *Bluetooth* products.

Frontline was the first to offer a *Bluetooth* low energy analyzer solution, FBleA, more than two years ago! The FBleA *Bluetooth* protocol analyzer requires no setup and is based on the “easy to use” core FTS™ software engine. Frontline is committed to *Bluetooth* low energy wireless technology and supports companies as they leverage the power of *Bluetooth* low energy technology in their devices. Like its predecessor, the BPA 500 dual mode *Bluetooth* protocol analyzer is designed to simplify the *Bluetooth* low energy development and troubleshooting process and designed to help companies create exciting new, innovative *Bluetooth* low energy wireless devices.

Frontline is constantly updating their *Bluetooth* family of analyzers to reflect the latest changes in the *Bluetooth* specifications and industry trends. Frontline solutions help keep developers on top of the latest updates and changes in the *Bluetooth* specification and help implement changes in their designs. The right tool is a must. With Frontline tools you can “Debug Communications FasterSM”.

About Frontline

Frontline is the world’s leading provider of *Bluetooth* protocol analysis technology. 84 out of the Fortune 100 companies use Frontline. Frontline’s FTS4BT *Bluetooth* analyzer is the de-facto industry standard and is used by hundreds of company’s globally including, CSR, Broadcom, Atheros, Apple, Nokia, Samsung, Sony, Toshiba, Panasonic, and Marvell. Frontline’s technology has been integrated into the Bluetooth SIG’s PTS qualification tool which is the system used to determine if a product meets *Bluetooth* interoperability standards. Frontline supports the entire range of *Bluetooth* technology: Basic Rate/Enhanced Data Rate, low energy, and High Speed.
